Zone no : Zone 8**

1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Solution:

Step 1: Create Custom Objects

Assuming you have two custom objects, let's call them "College_C" and "C Department_C". If you haven't already created these objects, you can do so by going to Setup > Object Manager > Create > Custom Object.

The screenshot shows the Salesforce Setup interface with the following details:

- Header:** Includes the Salesforce logo, a search bar labeled "Search Setup", and various navigation icons.
- Breadcrumbs:** "Setup" > "Object Manager" > "New Custom Object".
- Title Bar:** "SETUP" and "New Custom Object".
- Page Content:**
 - Custom Object Definition Edit:** Buttons for "Save", "Save & New", and "Cancel". A note says "Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles." with links to "Tell me more!" and "Don't show this message again".
 - Custom Object Information:** Fields for "Label" (college) and "Plural Label" (colleges), both with examples. A checkbox "Starts with vowel sound" is unchecked.
 - Object Name:** Field for "Object Name" (college) with example "Account".
 - Description:** A large text area for describing the object.
 - Context-Sensitive Help Setting:** Radio buttons for "Open the standard Salesforce.com Help & Training window" (selected) and "Open a window using a Visualforce page".
 - Content Name:** A dropdown menu showing "None".
 - Enter Record Name Label and Format:** A note about Record Name appearing in various places. Fields for "Record Name" (College Name) and "Data Type" (Text).
 - Optional Features:** Checkboxes for "Allow Reports", "Allow Activities", "Track Field History", "Allow in Chatter Groups", and "Enable Licensing".
 - Object Classification:** A note about classification settings. Checkboxes for "Allow Sharing", "Allow Bulk API Access", and "Allow Streaming API Access".
 - Deployment Status:** Radio buttons for "In Development" (unchecked) and "Deployed" (checked).
 - Search Status:** A note about search settings. A checkbox for "Allow Search" is unchecked.
 - Object Creation Options (Available only when custom object is first created):** Checkboxes for "Add Notes and Attachments related list to default page layout" and "Launch New Custom Tab Wizard after saving this custom object".
 - Buttons at the bottom:** "Save", "Save & New", and "Cancel".

Second custom objects, let's call them "Department_C"

The screenshot shows the Salesforce Setup Object Manager interface. At the top, there's a navigation bar with 'Setup', 'Home', and 'Object Manager'. The main title is 'Object Manager' with a 'New Custom Object' subtitle. A message bar at the top says 'Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles.' Below this is the 'Custom Object Definition Edit' section. It includes fields for 'Label' (set to 'department') and 'Plural Label' (set to 'departments'), both with examples of 'Account' and 'Accounts'. There's also a checkbox for 'Starts with vowel sound'. The 'Object Name' field is set to 'department' with an example of 'Account'. A 'Description' field is present but empty. Under 'Context-Sensitive Help Setting', the option 'Open the standard Salesforce.com Help & Training window' is selected. The 'Content Name' dropdown is set to 'None'. The 'Enter Record Name Label and Format' section shows 'Record Name' as 'Department Name' with an example of 'Account Name' and 'Data Type' set to 'Text'. The 'Optional Features' section contains checkboxes for 'Allow Reports', 'Allow Activities', 'Track Field History', 'Allow in Chatter Groups', and 'Enable Licensing'. The 'Object Classification' section has checkboxes for 'Allow Sharing', 'Allow Bulk API Access', and 'Allow Streaming API Access', with 'Allow Sharing' checked. The 'Deployment Status' section shows 'Deployed' is selected. The 'Search Status' section has a checkbox for 'Allow Search' which is unchecked. The 'Object Creation Options' section has checkboxes for 'Add Notes and Attachments related list to default page layout' and 'Launch New Custom Tab Wizard after saving this custom object', both of which are unchecked. At the bottom are 'Save', 'Save & New', and 'Cancel' buttons.

Step 2: Create a Master-Detail Relationship

To create a Master-Detail relationship between these two custom objects, follow these steps:

1. Go to Setup > Object Manager.
2. Click on "College_c" to open its

settings.

3. In the left sidebar, click on "Fields & Relationships."
4. Click the "New" button to create a new custom field.
5. Choose "Master-Detail Relationship" as the data type.
6. Enter a label for the relationship, e.g., "Department __c."
7. Choose " Department__c" as the related object.
8. Configure other settings as needed and click "Next."
9. Specify the field-level security and add it to relevant page layouts.
10. Click "Next" and "Save" to create the relationship.

The screenshot shows the Salesforce Setup interface with the following details:

Header: Search Setup, Setup, Home, Object Manager

Breadcrumbs: SETUP > OBJECT MANAGER CDepartment

Left Sidebar (Details):

- Fields & Relationships
- Page Layouts
- Lightning Record Pages
- Buttons, Links, and Actions
- Compact Layouts
- Field Sets
- Object Limits
- Record Types
- Related Lookup Filters
- Restriction Rules
- Scoping Rules
- Triggers
- Flow Triggers
- Validation Rules

Right Panel (Details):

Setting	Value
Description	
API Name	CDepartment__c
Custom	✓
Singular Label	CDepartment
Plural Label	CDepartments
Enable Reports	
Track Activities	
Track Field History	
Deployment Status	Deployed
Help Settings	Standard salesforce.com Help Window

Buttons: Edit, Delete

The screenshot shows the Salesforce Setup interface with the following details:

Header: Search Setup, Setup, Home, Object Manager

Breadcrumbs: SETUP > OBJECT MANAGER CDepartment

Left Sidebar (Details):

- Fields & Relationships
- Page Layouts
- Lightning Record Pages
- Buttons, Links, and Actions
- Compact Layouts
- Field Sets
- Object Limits
- Record Types
- Related Lookup Filters
- Restriction Rules
- Scoping Rules
- Triggers
- Flow Triggers
- Validation Rules

Right Panel (New Relationship):

Step 3. Enter the label and name for the lookup field (Step 3 of 6)

Field Label: college

Field Name: college

Description:

Help Text:

Child Relationship Name: CDepartments

Sharing Setting:

- Read Only: Allows users with at least Read access to the Master record to create, edit, or delete related Detail records.
- Read/Write: Allows users with at least Read/Write access to the Master record to create, edit, or delete related Detail records.

Allow reparenting: Child records can be reparented to other parent records after they are created

Auto add to custom report type: Add this field to existing custom report types that contain this entity

Buttons: Previous, Next, Cancel

The screenshot shows the Salesforce Setup interface for creating a new relationship. The left sidebar lists various setup options under 'Fields & Relationships'. The main panel is titled 'New Relationship' and is on 'Step 2. Choose the related object'. It shows a dropdown menu set to 'college'. Navigation buttons at the top right include 'Help for this Page', 'Previous', 'Next', and 'Cancel'.

The screenshot shows the Salesforce Setup interface for creating a new custom field. The left sidebar lists various setup options under 'Fields & Relationships'. The main panel is titled 'New Custom Field' and is on 'Step 1. Choose the field type'. Under 'Data Type', the 'Roll Up Summary' option is selected. A detailed description of the field type is provided, mentioning it creates a relationship that links the object to another object. The 'Next' button is visible at the top right.

Step 3: Create the Roll-Up Summary Field

Now, let's create a Roll-Up Summary Field on the "College_C" to calculate the total number of related records in "Department_C":

1. Still on the "College_C" settings, go to "Fields & Relationships."

- 2. Click the "New" button to create a new custom field.**
- 3. Choose "Roll-Up Summary" as the data type.**
- 4. Enter a label for the field, e.g.,**
- 5. Choose "Count" as the Roll-Up Type.**
- 6. Select "Department_c" as the object to roll up information from.**
- 7. Specify the filter criteria if you want to filter the related records.**
- 8. Configure other settings as needed and click "Next."**
- 9. Specify the field-level security and add it to relevant page layouts.**
- 10. Click "Next" and "Save" to create the Roll-Up Summary Field.**

Tabs

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

New Custom Field

Step 1. Choose the field type

Specify the type of information that the custom field will contain.

Data Type

- None Selected Select one of the data types below.
- Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.
- Roll-Up Summary A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.
- Lookup Relationship A relationship field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.
- Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:
 - The relationship field is required on all detail records.
 - The ownership and sharing of detail records are determined by the master record.
 - When a user deletes the master record, all detail records are deleted.
 - You can create rollup summary fields on the master record to summarize the detail records.
- External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
- Boolean Allows users to select a True (checked) or False (unchecked) value.

Fields & Relationships

The screenshot shows the Salesforce Setup interface with the 'Tabs' page selected. The left sidebar has a search bar and navigation links for 'User Interface' and 'Rename Tabs and Labels'. The main content area is titled 'Custom Tabs' and includes a note about creating new custom tabs. It lists sections for 'Custom Object Tabs', 'Web Tabs', 'Visualforce Tabs', 'Lightning Component Tabs', and 'Lightning Page Tabs'. Under 'Custom Object Tabs', there is a table with columns 'Action', 'Label', 'Tab Style', and 'Description'. The table contains five rows:

Action	Label	Tab Style	Description
Edit Del	Book1	Box	
Edit Del	Departments	Lightning	
Edit Del	collegea	Jewel	
Edit Del	Research_Proposal	Square	
Edit Del	student	Box	

Conclusion:

Now, whenever you create or update a record in the "Department__c" related to a "College__c," the "TotalCount__c" field on the "College__c" will automatically update to show the total number of related records.

Remember to adjust field-level security, validation rules, and page layouts as needed to ensure that your custom objects and fields are appropriately configured for your organization's requirements.

History

2. If there is 2 user, User A and User B in the organisation and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply the Security for the users.

Solution:

Step 1: Create two separate custom profiles, one for User A and one for User B.

The screenshot shows the Salesforce Setup interface with the 'Profiles' page open. The left sidebar is collapsed, and the main area displays a table of profiles. The table has columns for 'Action', 'Profile Name', 'User License', and 'Custom'. The 'Custom' column contains several checked checkboxes, indicating that these profiles have been customized. The profiles listed include 'Analytics Cloud Integration User', 'Analytics Cloud Security User', 'Authenticated Website', 'Authenticated Website', 'Authenticated Website', 'Chatter External User', 'Chatter Free User', 'Chatter Moderator User', 'Contract Manager', 'Cross Org Data Proxy User', 'Custom: Marketing Profile', 'Custom: Sales Profile', 'Custom: Support Profile', 'Customer Community Login User', 'Customer Community Plus Login', 'Customer Community Plus User', 'Customer Community User', and 'Customer Portal Manager Custom'. The 'Custom' checkbox is checked for profiles like 'Custom: Marketing Profile', 'Custom: Sales Profile', and 'Customer Community User'.

The screenshot shows the Salesforce Setup interface for managing Profiles. The left sidebar is titled "SETUP" and includes sections for Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and ADMINISTRATION. Under ADMINISTRATION, the "Users" section is expanded, showing sub-options: Permission Set Groups, Permission Sets, Profiles (which is selected and highlighted in blue), Public Groups, Queues, Roles, User Management Settings, and Users.

The main content area is titled "Profiles" and displays a table of existing profiles. The columns are "Action", "Profile Name", "User License", and "Custom". The table lists the following profiles:

Action	Profile Name	User License	Custom
<input type="checkbox"/> Edit Clone	Salesforce API Only System Integrations	Salesforce Integration	<input type="checkbox"/>
<input type="checkbox"/> Edit Delete	salesmanager	Salesforce	<input checked="" type="checkbox"/>
<input type="checkbox"/> Edit Clone	Silver Partner User	Silver Partner	<input type="checkbox"/>
<input type="checkbox"/> Edit Clone	Solution Manager	Salesforce	<input type="checkbox"/>
<input type="checkbox"/> Edit Clone	Standard Platform User	Salesforce Platform	<input type="checkbox"/>
<input type="checkbox"/> Edit Clone	Standard User	Salesforce	<input type="checkbox"/>
<input type="checkbox"/> Edit Clone	System Administrator	Salesforce	<input type="checkbox"/>

At the bottom of the page, there are navigation links for "1-7 of 7" and "0 Selected", and a "Page 1 of 1" indicator.

The screenshot shows the "Clone Profile" page. The left sidebar is identical to the previous screenshot. The main content area is titled "Clone Profile" and contains the following message: "Enter the name of the new profile." Below this, a note says "You must select an existing profile to clone from." A table shows the details of the profile to be cloned: "Existing Profile: Standard Platform User", "User License: Salesforce Platform", and "Profile Name: [redacted]". At the bottom of the form are "Save" and "Cancel" buttons.

The screenshot shows the Salesforce Setup interface with the 'Profiles' tab selected. On the left, the navigation sidebar is open, showing various setup categories like Service Setup Assistant, Multi-Factor Authentication Assistant, and Administration (with sub-options like Users, Permission Set Groups, and Profiles). The main content area is titled 'Clone Profile' and displays a form with the following fields:

Existing Profile	Standard Platform User
User License	Salesforce Platform
Profile Name	Manage

Below the form are 'Save' and 'Cancel' buttons. A note at the top says 'You must select an existing profile to clone from.' and a help link 'Help for this Page'.

The screenshot shows the Salesforce Setup interface with the 'Profiles' tab selected. The left sidebar is identical to the previous screenshot. The main content area is titled 'Profile Manager' and displays a table of profiles. One profile is listed:

Name	Manager	Custom Profile
Standard Platform	Manager	✓

A note above the table says 'Users with this profile have the permissions and page layouts listed below. Administrators can change a user's profile by editing that user's personal information.' Below the table, there are sections for 'Page Layouts' and 'Standard Object Layouts', each listing various layouts and their properties.

The screenshot shows the Salesforce Setup interface with the 'Users' tab selected. On the left, a sidebar lists various setup categories like Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, etc. The main content area displays the 'User Detail' page for a user named 'Sowmya bala'. The user's name is listed at the top, followed by a list of profile details. The 'Role' section indicates the user is a 'Manager'. Other details include email (2k20cse179@kiot.ac.in), nickname (User16961677128256452616), title (worker), company (kiot bank), and address (GMT+05:30 India Standard Time (Asia/Kolkata)). The 'Delegated Approver' section shows 'Only if I am an approver'. The 'Accessibility Mode' section has 'Classic Only' checked. The 'Federation ID' and 'App Registration' sections are also visible.

The screenshot shows a Gmail inbox with 5,318 messages. A new message from 'support@salesforce.com' is highlighted. The subject line is 'Welcome to Salesforce!'. The message body contains a 'Verify Account' button and a URL: <https://artificialintelligence-d-dev-ed.develop.my.salesforce.com>. Below the URL, it says 'Again, welcome to Salesforce!' and includes a copyright notice: '© Copyright 2000-2018 salesforce.com, inc. All rights reserved. Various trademarks held by their respective owners.'

The screenshot shows the Salesforce Setup interface under the Profiles section. On the left, the navigation sidebar includes options like Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and ADMINISTRATION. Under ADMINISTRATION, the 'Users' section is expanded, showing sub-options: Permission Set Groups, Permission Sets, Profiles (which is selected and highlighted in blue), Public Groups, Queues, Roles, and User Management Settings. The main content area displays a table titled 'Profiles' with the following data:

Action	Profile Name	User License	Custom
<input type="checkbox"/> Edit Clone	Salesforce API Only System Integrations	Salesforce Integration	<input type="checkbox"/>
<input type="checkbox"/> Edit Delete	salesmanager	Salesforce	<input checked="" type="checkbox"/>
<input type="checkbox"/> Edit Clone	Silver Partner User	Silver Partner	<input type="checkbox"/>
<input type="checkbox"/> Edit Clone	Solution Manager	Salesforce	<input type="checkbox"/>
<input type="checkbox"/> Edit Clone	Standard Platform User	Salesforce Platform	<input type="checkbox"/>
<input type="checkbox"/> Edit Clone	Standard User	Salesforce	<input type="checkbox"/>
<input type="checkbox"/> Edit Clone	System Administrator	Salesforce	<input type="checkbox"/>

At the bottom of the page, there are navigation links for 'Previous' and 'Next', and a page number indicator 'Page 1 of 1'.

The screenshot shows the 'Clone Profile' dialog box. The title bar says 'Clone Profile'. The instructions 'Enter the name of the new profile.' are displayed above the input field. A required information indicator (a red square with an exclamation mark) is shown next to the instruction 'You must select an existing profile to clone from.'. The dialog contains the following fields:

Existing Profile	Standard Platform User
User License	Salesforce Platform
Profile Name	<input type="text" value="salesmanager1"/>

At the bottom of the dialog are 'Save' and 'Cancel' buttons.

The screenshot shows the Salesforce Setup interface with the 'Users' page selected. The left sidebar navigation includes 'Setup', 'Home', 'Object Manager', and a search bar. Under 'User Management Settings', 'Users' is expanded, showing sub-options: Feature Settings (Data.com, Prospector), Service (Embedded Service, Messaging for In-App and Web User, Verification), and User Interface (Action Link Templates, Actions & Recommendations, App Menu). The main content area displays the 'Users' configuration page with sections for Mailing Address, Single Sign On Information, Locale Settings, and Approver Settings. The 'Mailing Address' section contains fields for Street, City, Zip/Postal Code, State/Province, and County. The 'Single Sign On Information' section includes a Federation ID field. The 'Locale Settings' section shows Time Zone (GMT+05:30 India Standard Time (Asia/Kolkata)), Locale (English (India)), and Language (English). The 'Approver Settings' section includes fields for Delegated Approver and Manager, and a dropdown for Receive Approval Request Emails (set to 'Only if I am an approver'). A checkbox for 'Generate new password and notify user immediately' is checked. At the bottom are 'Save', 'Save & New', and 'Cancel' buttons.

This screenshot is identical to the one above, but with specific address details filled in. In the 'Mailing Address' section, the Street field contains '4/194, ariyampalayam, Uthamasholapuram ..', the City field contains 'SALEM', the Zip/Postal Code field contains '636308', the State/Province field contains 'TAMIL NADU', and the County field is empty. All other settings remain the same as in the first screenshot.

Previous Next | Page 1 of 2

<https://artificialintelligence-d-dev-ed.develop.lightning.force.com/one/app#/setup/PermSets/home>

Step 2:

Permission Sets:

- Create two permission sets, one for User A and one for User B.

Object-Level Security:

- In each profile and permission set, set the object-level security for the Account object to "Read" to ensure that both User A and User B can view Account records.

Record-Level Security:

- Implement record-level security using Criteria-Based Sharing Rules.
- Create a sharing rule that shares Account records owned by User A with User A and records owned by User B with user B.
- For the sharing rule criteria, specify that records owned by User A are shared with user A, and records owned by User B are shared with User B.

Ownership:

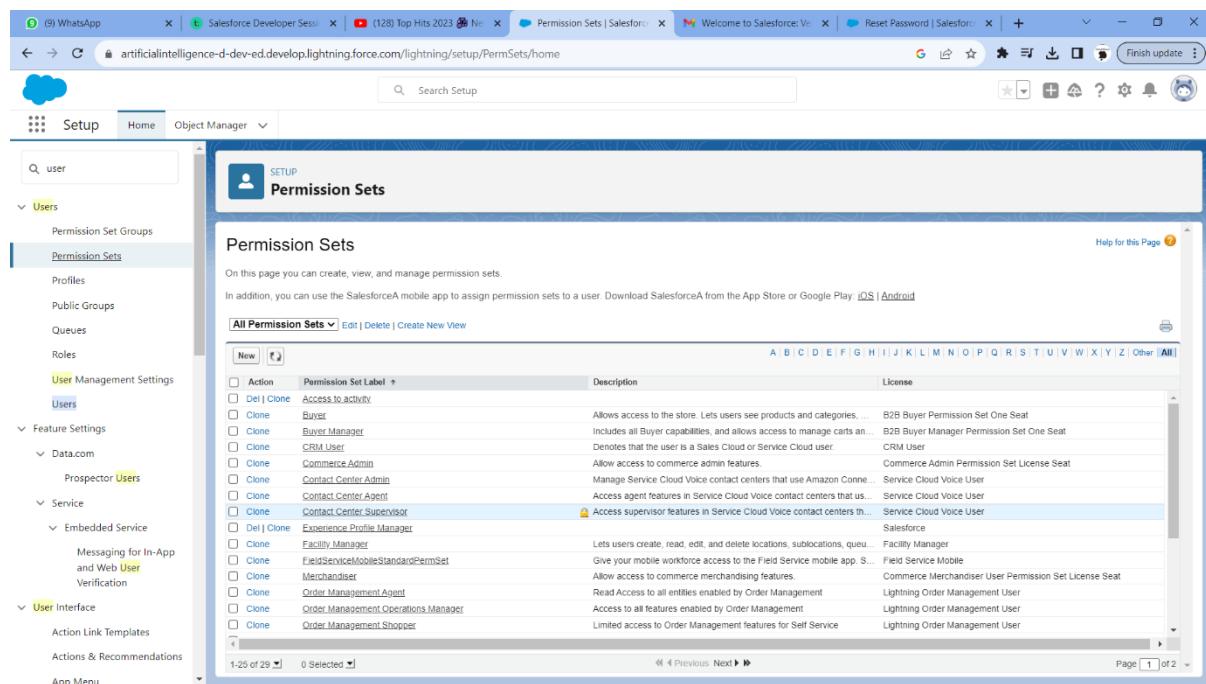

- Ensure that the Account records are owned by the respective users, with User A owning their records and User B owning their records.

Organization-Wide Defaults:

- Set the organization-wide defaults for the Account object to "Private" to ensure that records are private by default.

Testing:

- Test the setup by logging in as User A and User B separately to verify that they cannot access each other's records.

The screenshot shows the Salesforce Setup interface with the following details:

- Page Navigation:** 1-25 of 29, 0 Selected, Previous, Next, Page 1 of 2

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' section selected. A sub-menu for 'Users' is open, showing options like 'Permission Set Groups', 'Permission Sets', 'Profiles', 'Public Groups', 'Queues', 'Roles', 'User Management Settings', and 'Users'. The 'Permission Sets' option is highlighted. The main content area displays the 'Create' page for a new permission set. The 'Enter permission set information' section includes fields for 'Label' (set to ' '), 'API Name' (set to ' '), and 'Description'. Below this, a note about session activation is present. The 'Select the type of users who will use this permission set' section contains a note about who will use the permission set and three options: 'Choose --None--', 'Choose a specific user license', and 'Choose a specific permission set license'. A note about license assignment follows. The 'License' dropdown is set to 'None'. At the bottom right of the form are 'Save' and 'Cancel' buttons.

This screenshot is identical to the one above, but with different input values. In the 'Label' field, the value 'salesmanager' has been typed. In the 'API Name' field, the value 'salesmanager' has also been typed. The rest of the page, including the description, session activation, user selection, and license dropdown, remains the same as in the first screenshot.

3. . Suppose there are 2 Users and they are having Create, Read, Edit access on Account Object with the same profile but we want to open up the access for one user to delete how will you implement the Security setting.

Solution:

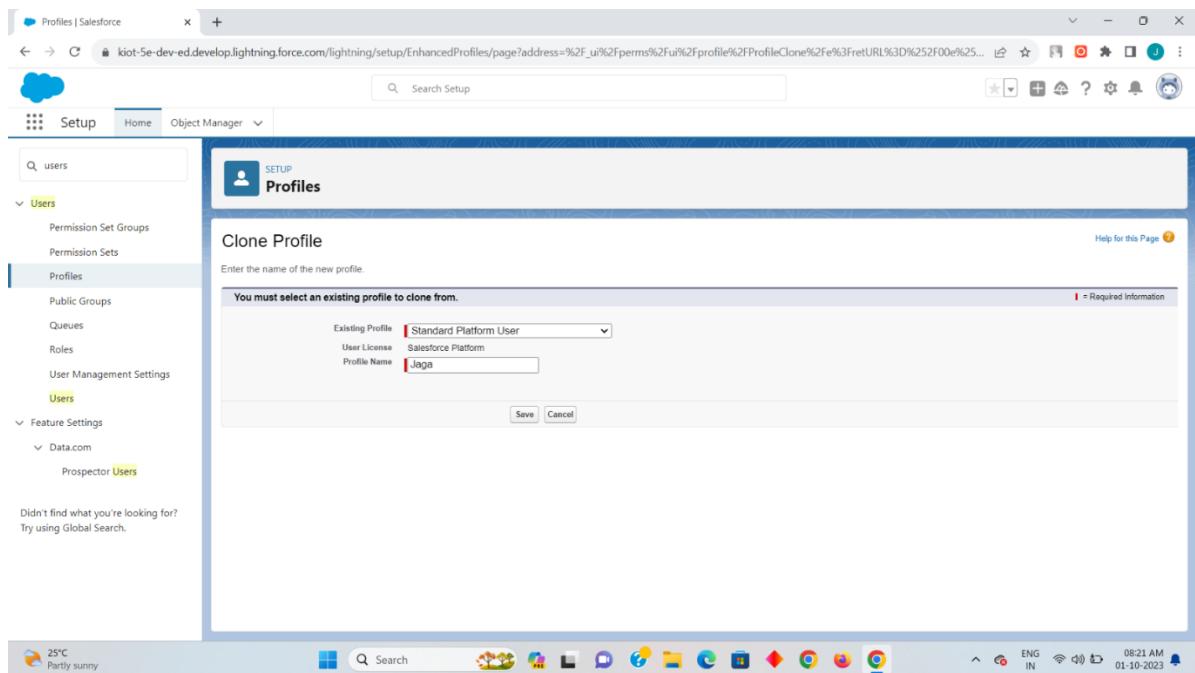

Step 1: we need create a profile for the two user which has the access to Create, Read, Edit for follow as per.

Setup-quick search[profile]

The screenshot shows the Salesforce Setup interface for managing Profiles. The left sidebar includes sections for Permission Set Groups, Permission Sets, Profiles (selected), Public Groups, Queues, Roles, User Management Settings, Users (selected), Feature Settings, and Data.com. A note at the bottom says "Didn't find what you're looking for? Try using Global Search." The main content area is titled "Profiles" and shows a table of existing profiles. The columns are "Action", "Profile Name", "User License", and "Custom". The "User License" column contains various license names like Analytics Cloud Integration User, Authenticated Website, Chatter External, Chatter Free, Chatter Moderator User, Contract Manager, Cross Org Data Proxy User, Custom Marketing Profile, Custom Sales Profile, Custom Support Profile, Customer Community Login User, Customer Community Plus Login, and Customer Community Plus. The "Custom" column indicates which profiles are custom profiles, with several checked off. Navigation buttons at the bottom include "Page 1 of 2".

Step 2:

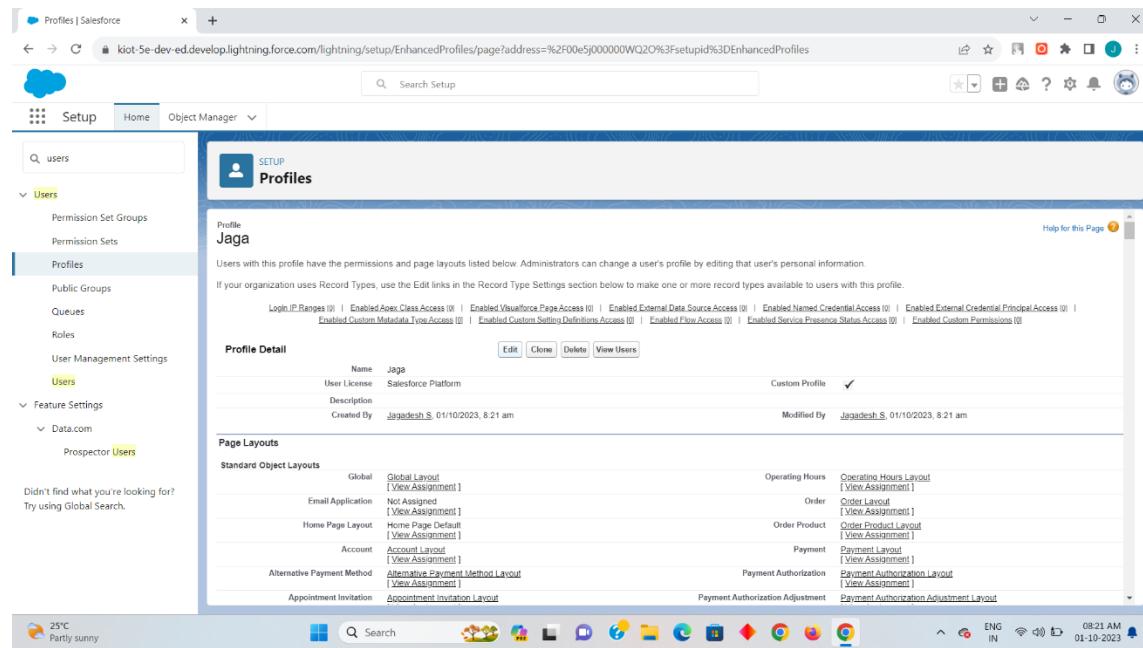

Click on the new to create a new profile along with the label and Api

Here I had made it my profile name as Jaga and the existing profile as Standard Platform User.

Step 3:

Now click on the edit and scroll down to custom object settings and enable the read,create,edit and view options. After that click on save.

25°C ENG IN 08:25 AM 01-10-2023

Step 7:

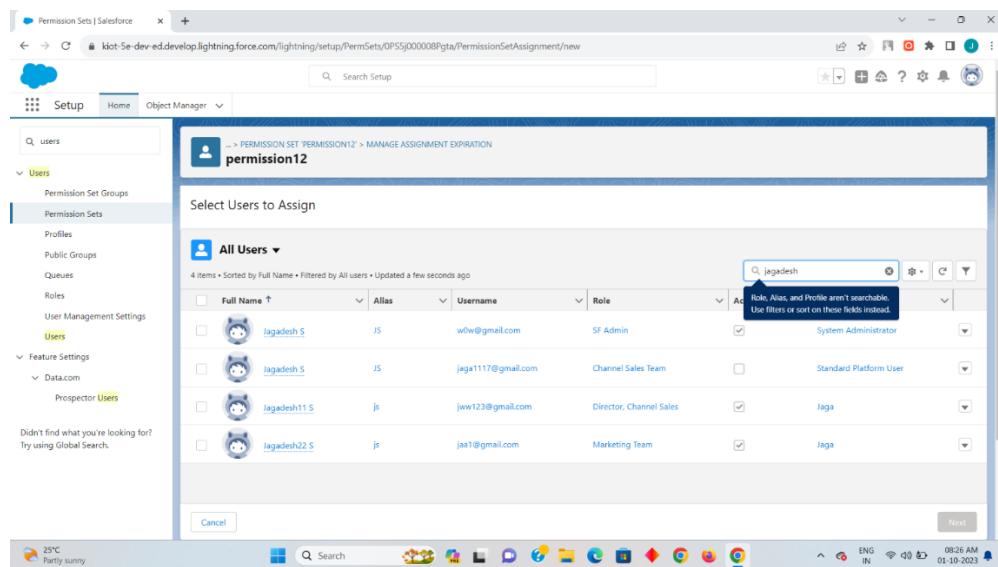

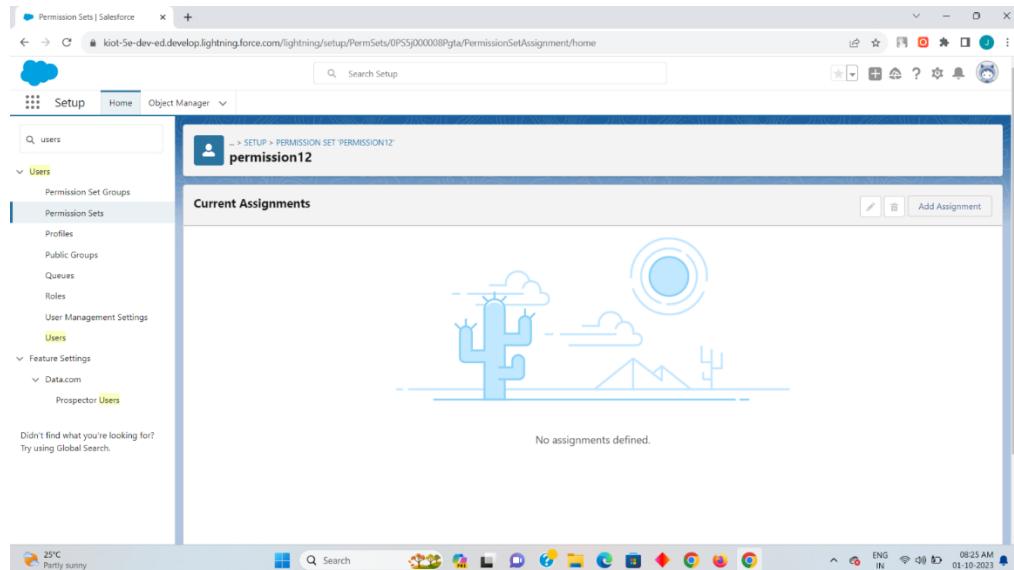

Now to give the specific delete access to the user click on edit on the Account and then enable the read,create,edit and the delete on it so that the permission set will have a specific special access on it. once it has been done click on save and then click on manage assignment.

Step 8

Now click on add assignment there you will find your two created users click on any one user to give a special access as delete on it

and then click on assign so that the specific selected user can have a special access as delete on it.

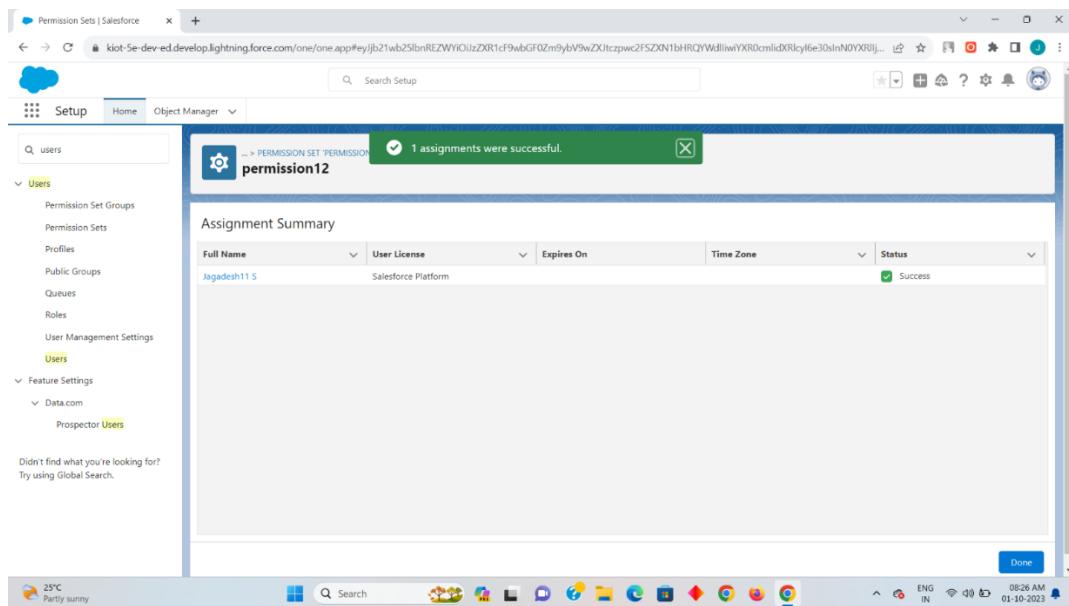

The screenshot shows the Salesforce Setup interface for managing permission set assignments. The left sidebar is collapsed, and the main area displays a list of users under the 'Users' section. A specific user, 'Jagadesh11 S', is highlighted with a checkmark. The interface includes a search bar at the top and a navigation bar at the bottom.

Click on next.

The screenshot shows the continuation of the permission set assignment process. It asks for an expiration option for the assigned users. The 'No expiration date' radio button is selected. Below this, there is a table showing the selected user 'Jagadesh11 S' with their details and an 'Expires On' field set to 'Never Expires'. The interface includes a search bar at the top and a navigation bar at the bottom.

Now click on Assign.

Now the specific access for the Jagadesh11 user has been assigned successfully.

4.Create a screen flow for a basic survey to fill in the details for any form.

Solution:

Step 1: Create a Custom Object

The next step is to create a custom object **Survey Result** and a few custom fields to store survey responses.

1. Click **Setup**.
2. In the Object Manager, click **Create | Custom Object**.
3. Now create a custom object **Survey Result** and fields as shown in the screenshot below:
4. Click **Save**.

Details		Fields & Relationships				
		FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Page Layouts	Comment	Comment__c	Text Area(255)			▼
Lightning Record Pages	Created By	CreatedById	Lookup(User)			▼
Buttons, Links, and Actions	Email	Email__c	Email			▼
Compact Layouts	Last Modified By	LastModifiedById	Lookup(User)			▼
Field Sets	Name	Name__c	Text(51)			▼
Object Limits	Owner	OwnerId	Lookup(User,Group)		✓	▼
Record Types	Rating	Rating__c	Picklist			▼
Related Lookup Filters	Survey Result Name		Name	Auto Number	✓	▼
Search Layouts						
Search Layouts for Salesforce Classic						
Triggers						
Validation Rules						

Step 2: Create a Thank You For Survey Lightning Email Template

1. Click App Launcher.
2. In the Quick Find box, type **Email Templates**.
3. Clicks on the **New Email template** button.
4. Name the **Lightning Email Template** and make sure to store it in the **Public Email Templates** folder.
5. Create a template like the following

screenshot.

The screenshot shows the Salesforce Email Template page for a template named "Thank You Email - Survey".

Details Tab:

- Email Template Name: Thank You Email - Survey
- Description: Made in Email Template Builder
- Related Entity Type: Survey Result
- Folder: Public Email Templates

Message Content Tab:

- Subject: Thank You For Completing Our Survey!
- HTML Value:

```
Hi {{Survey_Result__c.Name__c}},  
Thanks for taking time out to participate in our survey. We are very appreciative of the time you have taken to assist in our analysis, and commit to utilizing the information gained to contemplate and implement worthwhile improvements. We will share these results with you through your State Survey Agency, whom we also thank for their generous participation.  
Once again, we are extremely grateful for your contributing your valuable time, your honest information, and your thoughtful suggestions.  
Thanks,  
Automation Champion
```

- Last Modified By: Rakesh Gupta, 12/21/2020, 4:32 PM

Step 3: Create an Email Alert

1. Click **Setup**.
2. In the Quick Find box, type **Email Alerts**.
3. Select **Email Alerts**, click on the **New**

Email Alert button.

4. Name the Email Alert and click the Tab button. The Unique Name will populate.
5. For Object select Survey Result.
6. For the Email Template chooses Lightning Email Template Thank You Email – Survey.
7. For Recipient Type select Email Field: Email.
8. Click Save.

Edit Email Alert
Survey - Thank You Email

Help for this Page

Create an email alert to associate with one or more workflow rules, approval processes, or entitlement processes. When changing an email alert, any modifications will apply to all rules, approvals, or entitlement processes associated with it.

Email Alert Edit

Description: Survey - Thank You Email

Unique Name: Survey_Thank_You_Email

Object: Survey Result

Email Template: Thank You Email - Survey

Protected Component:

Recipient Type: User

Recipients:

Available Recipients	Selected Recipients
User: Integration User User: Rakesh Gupta User: Security User	Email Field: Email

Add Remove

You can enter up to five (5) email addresses to be notified.

Additional Emails:

From Email Address: Current User's email address

Make this address the default From email address for this object's email alerts.

Save | Save & New | Cancel

Step 4.1: Salesforce Flow – Create a Screen that Allow Users to Fill Survey

1. Click **Setup**.
2. In the Quick Find box, type **Flows**.
3. Select **Flows** then click on the **New Flow**.
4. Select the **Screen Flow** option and click on **Next** and configure the flow as follows:
 1. How do you want to start building: **Freeform**
5. We will use the **Screen** element to capture a **Survey response** form. Drag and drop a **Screen** element onto the canvas.

Step 4.2: Salesforce Flow – Add a Record Creates Element to Save Survey Response

1. Drag-and-drop the **Create Records** element onto the Flow designer.
2. Enter a name in the **Label (Save Response)** field; the **API Name** will auto-populate.
3. For **How Many Records to Create** – select **One**.

4. For How to Set the Record Fields
 - select Use separate resources, and literal values.
5. Select the Survey_Result__c object from the dropdown list.
6. Set Field Values for the Survey Result
 1. Row 1:
 1. Field: Comment__c
 2. Value: {!Comment}
 2. Click Add Row
 3. Row 2:
 1. Field: Email__c
 2. Value: {!Email.value}
 4. Click Add Row
 5. Row 3:
 1. Field: Name__c
 2. Value: {!Name.firstName}
{!Name.lastName}
 6. Click Add Row
 7. Row 3:
 1. Field: Rating__c
 2. Value: {!Rating}
7. Click Done.

Edit Create Records

Create Salesforce records using values from the flow.

* Label: Save Response * API Name: Save_Response

Description:

How Many Records to Create:
 One
 Multiple

How to Set the Record Fields:
 Use all values from a record
 Use separate resources, and literal values

Create a Record of This Object:
 * Object: Survey Result

Set Field Values for the Survey Result

Field	Value
Comment__c	<input type="text"/> A_a Comment X
Email__c	<input type="text"/> A_a Email > Value X
Name__c	<input type="text"/> (!Name.firstName) {!Name.lastName}
Rating__c	<input type="text"/> A_a Rating X
+ Add Field	
<input type="checkbox"/> Manually assign variables	

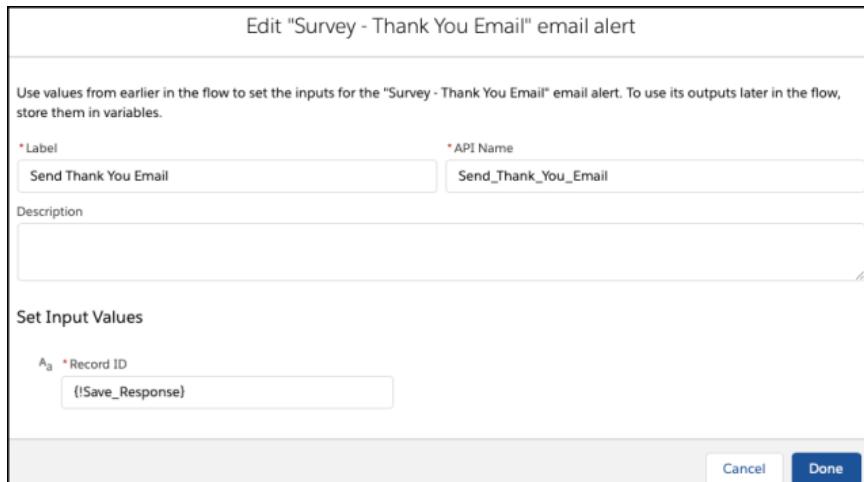

[Cancel](#) [Done](#)

Step 4.3: Salesforce Flow – Call an Action – Email Alert to Send Out Thank You Email

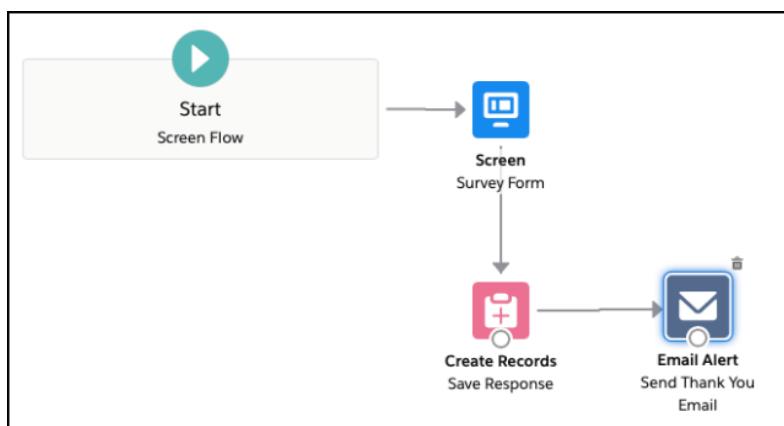

The next step is to call the **Survey – Thank You Email** email alert from flow so that when flow fires it triggers the thank you email to survey participants.

1. Under **Toolbox**, select **Element**.
2. Drag-and-drop **Action** element onto the Flow designer.
3. In the **Action** box, type **Survey – Thank You Email**.

- 4. Clicks on the Survey – Thank You Email email alert.**
- 5. Click Done.**

In the end, Sergio's Flow will look like the following screenshot:

- 1. Click Save.**
- 2. Enter Flow Label the API Name will auto-populate.**
- 3. Click Show Advanced.**
- 4. How to Run the Flow: User or System Context—Depends on How Flow is**

Launched

5. Type: Screen Flow
6. API Version for Running the Flow: 51
7. Interview Label: Survey
{\$Flow.CurrentDateTime}
8. Click Save.

Save as

[A New Version](#) [A New Flow](#)

* Flow Label: Survey

* Flow API Name: Survey

Description:

Hide Advanced

How to Run the Flow: User or System Context—Depends on How Flow is Launched

* Type: Screen Flow

* API Version for Running the Flow: 51

Interview Label: Survey {\$Flow.CurrentDateTime}

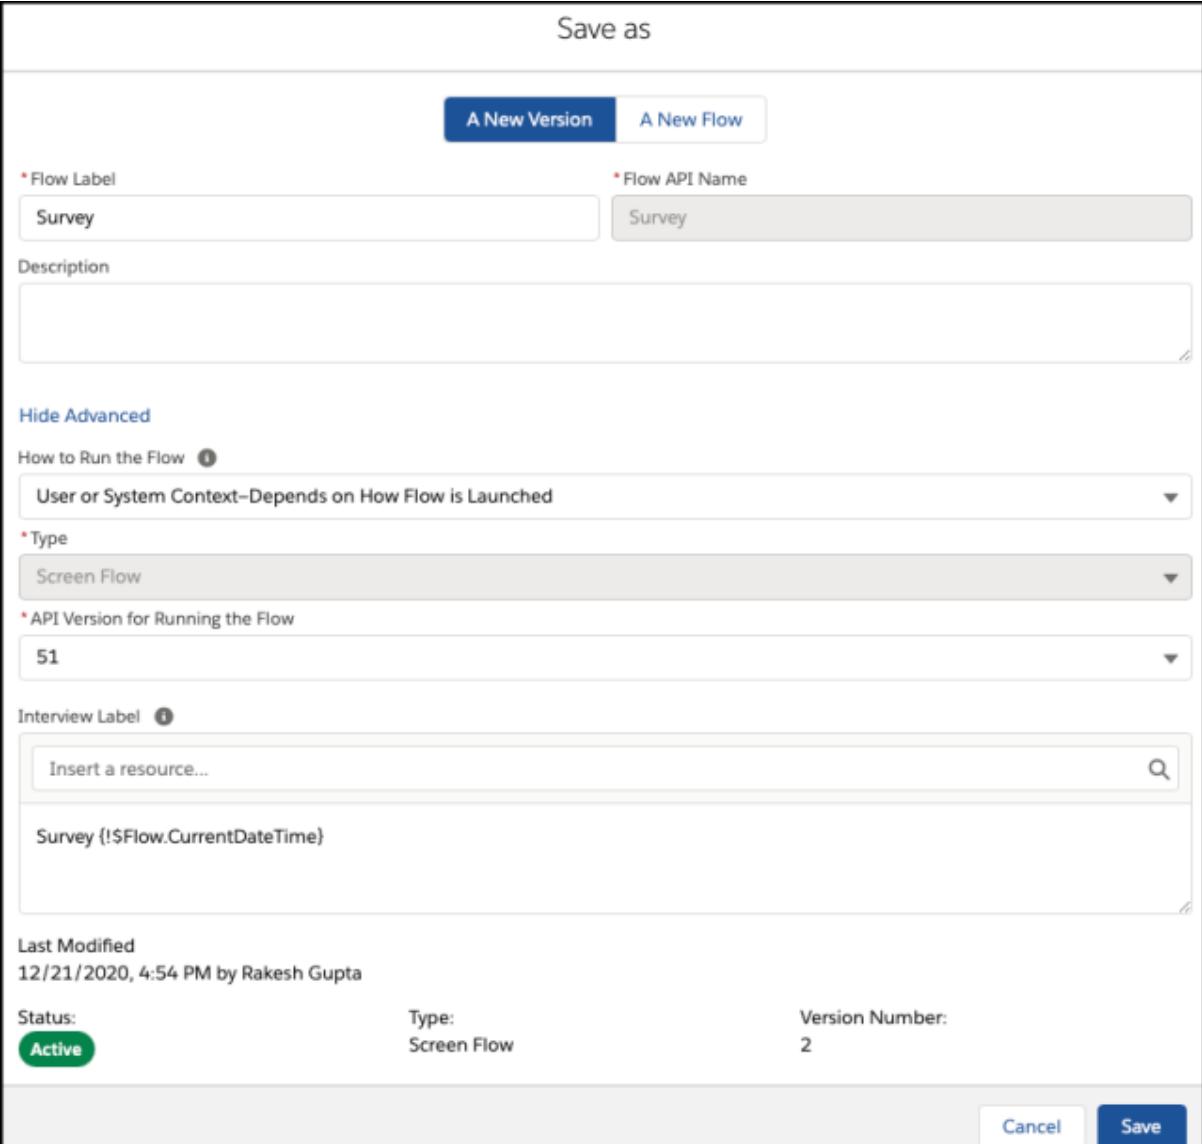

Last Modified: 12/21/2020, 4:54 PM by Rakesh Gupta

Status: [Active](#)

Type: Screen Flow

Version Number: 2

[Cancel](#) [Save](#)

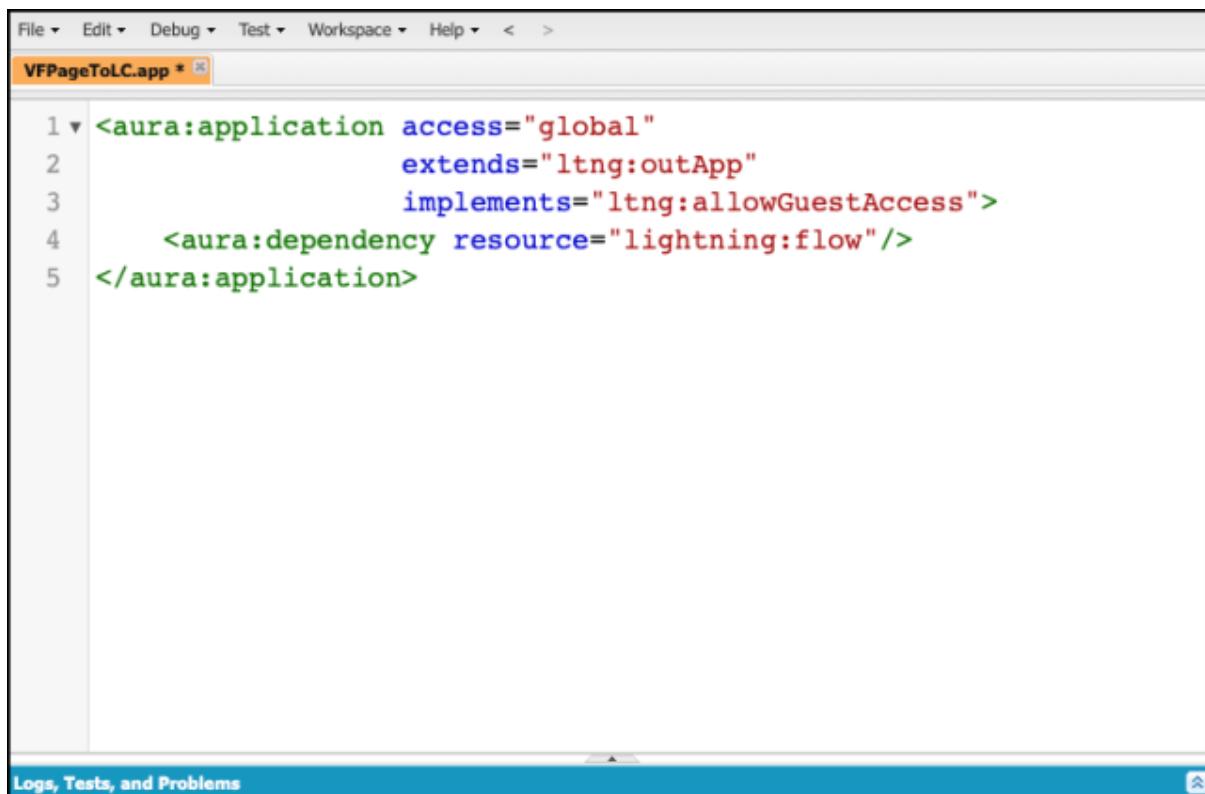

Step 5: Create a Lightning Application to Render Lightning Runtime for Flow in a

Visualforce Page

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

1. Click **Setup | Developer Console**
2. Navigate to **File | New | Lightning Application**
3. Enter a **Name (VFPageToLC)** field, make sure to select the **Lightning Out Dependency App** checkbox.
4. Click **Submit**.
5. Copy code from [**GitHub**](#) and paste it into your Lightning Application.
6. **Save** your code.

The screenshot shows the Salesforce IDE interface with the following details:

- Toolbar:** File, Edit, Debug, Test, Workspace, Help.
- Code Editor:** The file is named "VFPageToLC.app". The code is as follows:

```
1 <aura:application access="global"
2         extends="ltng:outApp"
3         implements="ltng:allowGuestAccess">
4             <aura:dependency resource="lightning:flow"/>
5         </aura:application>
```
- Status Bar:** Logs, Tests, and Problems.

Step 6: Create a Visualforce Page and Embed Your Flow Into It

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

Add the Lightning Components for Visualforce JavaScript library to your Visualforce page using the **<apex:includeLightning/>** component. In the Visualforce page, reference the dependency app. Then write a JavaScript

function that creates the component on the page using `$Lightning.createComponent()`

1. Click Setup.
2. In the Quick Find box, type **Visualforce Pages**.
3. Clicks on the **New** button.
4. Copy code from [GitHub](#) and paste it into your visualforce page
5. Click Save.

The screenshot shows the Visualforce Page Editor interface. At the top, there's a header with tabs like 'Page Edit', 'Save', 'Quick Save', 'Cancel', 'Where is this used?', 'Component Reference', and 'Preview'. Below the header, the 'Page Information' section is visible, showing 'Label' set to 'Survey', 'Name' set to 'Survey', and a checked checkbox for 'Available for Lightning Experience, Experience Builder, mobile app'. The 'Visualforce Markup' tab is selected, displaying the following code:

```
<apex:page showheader="false" lightningStylesheets="true">
<head>
    <apex:includeLightning />
    <!--Use apex:includeLightning to add the Lightning Components for Visualforce JavaScript library to your Visualforce page-->
</head>
<body class="slds-scope">
    <div id="flowContainer" />
    <script>
        var statusChange = function (event) {
            if(event.getParam("status") === "FINISHED") {
                var outputVariables = event.getParam("outputVariables");
                var key;
                for(key in outputVariables) {
                    if(outputVariables[key].name === "myOutput") {
                        ...
                    }
                }
            }
        };
        $Lightning.use("c:VFPageToLC", function() {
            $Lightning.createComponent("lightning:flow", {"onstatuschange":statusChange}, "flowContainer", function (component) {
                component.startFlow("Survey");
            });
        });
    </script>
</body>
```

Step 7: Create a Force.com Site to Open Your Flow for Unauthenticated Access

Now we will create a site to open the flow for unauthenticated access.

- 1. Click Setup.**
- 2. In the Quick Find box, type Sites.**
- 3. Clicks on the New button.**
- 4. Fill the details as per the screenshot below:**
- 5. Click Save.**

The screenshot shows the 'Site Edit' page in the Salesforce interface. The page has a header with 'Site Edit' and buttons for 'Save' and 'Cancel'. It contains several input fields and dropdown menus for configuring a site. Key settings visible include:

- Site Label:** Survey
- Site Name:** Survey
- Site Description:** (Empty text area)
- Site Contact:** Rakesh Gupta
- Default Record Owner:** Rakesh Gupta
- Default Web Address:** http://katihar-developer-edition.gus.force.com/_survey
- Active:**
- Active Site Home Page:** Survey [Preview]
- Inactive Site Home Page:** InMaintenance [Preview]
- Site Template:** SiteTemplate
- Site Robots.txt:** (Empty text area)
- Site Favorite Icon:** (Empty text area)
- Analytics Tracking Code:** (Empty text area)
- URL Rewriter Class:** (Empty text area)
- Enable Feeds:**
- Clickjack Protection Level:** Allow framing by the same origin only (Recommended)
- Require Secure Connections (HTTPS):**
- Lightning Features for Guest Users:**
- Upgrade all requests to HTTPS:**
- Enable Content Sniffing Protection:**
- Enable Browser Cross Site Scripting Protection:**
- Referrer URL Protection:**
- Guest Access to the Payments API:**

Under site, Public Access Settings make sure that guest users have Create access on Survey Result object and Edit on the fields.

Proof of Concept

Now onward, if someone opens the site url and fills the form:

Survey
